Just unzip them somewhere inside your game's directory and use them as a mods.Q: How can I style an old version of vBulletin? I have an old vBulletin site that I need to style. In the old version, for the top nav bar (not the sticky nav bar) I've added a background-color and border to the links to make them all the same color, but they don't have a border and they are a different color than the body of the site. How do I do this? A: You can get rid of the "color" and "border" properties by adding to the class ".text\_color\_link" and ".text\_border\_link". In the newer versions of vBulletin, the link color can be modified in the backend, if you have access to the back end. See the documentation for more details.
